Next Generation Managed Print Services (MPS)

The workplace is changing with the emerging trends of mobile, big data and cloud technology. These changes have brought new challenges to enterprises such as enhancing security, corporate governance, transitioning from paper-based to digital and optimizing complicated workflows.

Fuji Xerox Next Generation Managed Print Services (MPS) goes beyond print and leverages our document management expertise with business process and IT outsourcing capabilities to increase business productivity, security, mobility and sustainability.
So, how can Fuji Xerox Next Generation MPS help you in your business?

This newly launched service goes beyond managed print services and focuses on a three-stage approach. The first stage is **Assess and Optimize** where Fuji Xerox experts use best-in-class tools and processes to assess our client’s print infrastructure and then providing an optimized print environment that helps our clients reduce their costs and supports their sustainability goals. The second stage is **Secure and Integrate**, where our goal is to ensure integration with client’s IT infrastructure in a secure and compliant way along with enabling printing from mobile devices and providing print server management solutions. The last stage is called **Automate and Simplify** where we help in improving productivity by automating paper-based processes by developing smart workflows.

---

**Realize the Most Suitable Print Environment for Customers**
- Uncover hidden costs for equipment, filing and processes
- Improve resource utilization through device optimization
- Reduce environmental impact on print
- Provide accurate total cost of ownership

---

**Strengthen the Security of Printing with Network Integration**
- Protect intellectual property from security threats
- Ensure regulatory compliance and mitigate risk
- Support IT infrastructure and integration
- Leverage data encryption and overwrite
- Authorize and authenticate for proactive security management
- Increase agility through cloud and mobile technologies

---

**Business Process Automation & Work-Style Change**
- Deliver solutions that improve your business processes
- Reduce paper use and provide digital alternatives
- Provide ongoing analytics to drive performance and process enhancements
- Analyze paper use in its role as an information asset
